

TECHNICAL DATA SHEET

Wall Paneling – Tongue & Groove

The mark of
responsible forestry

1. Product Description

Solid wood tongue & groove wall paneling (machimbre) designed for interior wall and ceiling applications. The product provides a natural wood appearance and decorative finish for interior spaces. Appearance-grade lumber is commonly used for interior paneling where visual quality and consistency are important.

2. Dimensions (Standard Production)

9.5 mm x 95 mm x 2000 mm
7.2 mm x 90.5 mm x 2440 mm

Custom sizes: Other dimensions can be manufactured according to customer requirements and project specifications.

3. Profile

Type: Tongue & Groove (T&G)
Edges: Precision machined for tight joint
Surface: Smooth planed surface suitable for decorative interior use

4. Grade / Quality

Grade: AB – Appearance Grade
Selected boards for a clean and uniform visual appearance, minimal knots and natural defects, limited color variation and consistent texture. Suitable for visible interior architectural applications.

5. Applications

Interior wall paneling
Decorative ceilings
Residential interiors
Commercial interiors

6. Moisture Content

Kiln dried. Typical range: 10–12%.

7. Packaging

Export packaging suitable for container shipment. Panels can also be packed with shrink wrap, allowing the product to be delivered ready for retail shelves and store display.
